

Provided Study Notes

Provided Study Notes are **built for learning, not convenience**. Notes are structured using evidence-based techniques, grounded in the actual lecture content, and designed to mark the start of a student's study process – not shortcut it.

What are **Provided Study Notes**?

This is a new feature in Genio Notes that generates a ready-to-use set of notes based on recording transcripts. Instead of a rigid, one-size-fits-all template, our study notes are flexible to suit your learners' needs. From rich content to Cornell notes to a simple bullet point list, there's a note type to suit every learner.

How does **Provided Study Notes** support your students?

Fosters Complete Student Independence:

Students who can't capture notes independently receive a full set of notes, reflecting exactly what was said in class – no delay, no coordination, and no reliance on a peer note-taker.

Utilizes Evidence-Based Notetaking Techniques:

This isn't another bullet-point summary. Provided Study Notes are informed by learning science and structured using techniques like the Cornell method to support encoding and recall.

Kickstarts the Studying Process:

Provided Study Notes give students a clear path to apply their knowledge. With Provided Study Notes, students can:

- Print for offline study
- Recreate from recall to reinforce learning
- Quiz themselves to test comprehension

Configure Feature Access to Meet Student Needs

Don't want certain learners using the feature? Switch it off at the click of a button.

We've added the **Managed Features toggle to Genio Admin**, to let you decide which of your students can use Provided Study Notes and our other AI features.

Our features are built around specific, identified student needs, that sometimes require more control to meet your institution requirements. Our features are offered to students by default, with the trust that they know their own needs better than anyone, and the reassurance that you can change access if you need to.
